

Good Driver Incentive Program

View As Requirements Change 1

Drivers:

- No Changes

Sponsors:

- Sponsor type users need the ability to toggle between the sponsor and driver views
 - o Must be able to do this without logging out and back in
 - o Must be able to perform all the operations that a driver can
 - EXCEPT placing an order from the catalog
 - Should automatically have points available when working in the driver view

Admins:

- Admin type users need the ability to toggle between the admin, sponsor and driver views
 - o Must be able to do this without logging out and back in
 - o Must be able to perform all the operations that a sponsor can
 - o Must be able to perform all the operations that a driver can
 - EXCEPT placing an order from the catalog
 - Should automatically have points available when working in the driver view

REMEMBER: you must turn these changes into user stories and add them to your backlog.

Every story that you add for this change must be tagged with: RC#1

The screenshot shows a Jira interface. At the top, there's a header 'NEW USER STORY *'. Below it is a large text input field containing 'NEW STORY....'. Under the input field, it says 'Unassigned' with a person icon, '0 comments' with a comment icon, and an 'Add tag' button. Below this is a list of existing user stories. The first one is '37 NEW STORY....' with 'Unassigned' status, '0 comments', and a tag field containing 'RC #...'. A 'Save' button is at the bottom right.
